

## **“Blind Coding”**

### **Objective:**

The motto of Blind Coding competition is to enhance programming skills through creating a specific program with off-screen. It is useful to determine someone's programming practice. It provides a way for good coding skill by writing the program correctly without syntax errors. Regular practice of it can make you a better programmer.

### **Rules and Regulations:**

Only one student can take part in one blind coding entry. Registration fee is Rs.250 per participant. For other multiple participation, 150 rs for other events.

A specific programming problem will be given to you to solve using the C-Programming language in stipulated time period. You will have to create that program with off-screen (i.e. the display/monitor will be off).

Students from IT or Computer Engineering branch can be participated in this event.

\* Apart from these, entry of student having knowledge of programming from other branch is eligible to be participated.

- Judges decision will be final.

For any further queries you can contact faculty co-ordinator.
