"Code Hunt"

Objective:

The objective of Code Hunt is to improve your coding skills through solving programming challenges. It provides a professional approach to learning programming, where you are presented with coding challenges of varying difficulty levels that require you to write code to solve a specific problem.

The challenges in Code Hunt are designed to cover a range of programming concepts and languages, so you can practice your coding skills and learn new concepts along the way. As you solve more challenges, you can earn points and climb up the leader board, providing a sense of achievement and motivation to keep improving your skills.
