"Project Presentation"

Objective:

'Yantram' is a word found in ancient scriptures whose meaning resemble almost similar to modern definition of machine. We are people whom to world look up for solution of modern challenges. We are potentially skilled enough to give sustainable solution to society and creating positive impacts.

This is the area where an engineer thrive his ideas to give a better solution to a problem. So technically if you are proposing a working model and having problem solving attitude then this is the area where you can show your ideas to your fellow community and get recognition.

Rules and Regulations:

Maximum 4 students can be participated as a team. Registration fees are Rs.250.00 per Participant for single event participation and for multiple event participation 150rs for other each event.

So participants have to present their working model or concept for some application orproblem. It is desirable if you also include any separate drawing for explanation. On the basis of working model and application your project entry will be accepted and classified according to area of specialization

1. Mechanical Engineering
2. Civil Engineering
3. Electrical and Electronics Engineering
4. IT and Computer Engineering

*Apart from these departments any related branch or inter-disciplinary project will also be accepted and classified in relevant Branch.

• Any special software or hardware required to run their hardware effectively should be arranged for by the participants themselves.

• Judges decision will be final and binding.

For any further queries you can contact faculty co-ordinator.
